Aaron,

Thanks so much for this information. I see you have copied Karina Budd on this email, so she will also get the following information.

Susan Nichols of Degesch is the chairman of the Phosphine Producers Association, so she would be the correct contact for support for the periodic review. This may be a different contact from Degesch than Karina Budd has on record, if the contact was listed many years ago. Susan's email address is: snichols@degeschamerica.com.

Karina, what do you have on record for Degesch or Phosphine Producers Association support for the periodic review of hydrogen phosphine? It might need to be updated.

Best regards,

Jane Eickhoff

(representative of Solvay/Cytec Industries Inc – member of the Phosphine Producers Association)

Jane,

Apologies for not responding to your original email.

I have attached the current version of the JMPR/CODEX review schedule. Hydrogen Phosphide is listed in the Excel workbook tab "Table 2A." This table is the JMPR priority list for JMPR 2021-2023, so it does appear that Hydrogen Phosphide has been prioritized for review but not formally schedule.

I also note that Degesch is listed as the sponsor. I would suggest contacting Karina Budd of the Australian Delegation to CCPR. She manages the working group responsible for the review schedule and should be able to provide additional information on the status of the periodic review and whether Degesch has indicated that they plan to support the periodic review. Ms. Budd's email is: Karina.Budd@agriculture.gov.au.

Let us know if you have any additional questions.

-Aaron

Hi David,

I have a question about the JMPR/CODEX schedule for reviewing chemicals – see the email I sent to Aaron Niman, below. I did not get a response from him and do not know if he is still at EPA. Can you answer my question, or is there someone else I should contact.

Best regards,
Jane Eickhoff

Dear Mr. Niman,

I am interested in finding out if phosphine (hydrogen phosphide) is on the schedule for CODEX reevaluation. Several years ago we heard that it was added to the list. Then we heard the review was postponed. Recently I found a summary that listed it as possibly being reviewed in a couple of years.

Are you able to tell me the status? I believe the Phosphine Producers Association members are interested in supporting it.

Best regards,

Jane Eickhoff
